DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claim 4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vause (US 3,885,186).

Regarding claims 4 and 2, Vause discloses an electric lamp in Fig. 1 which comprises a light-transmitting lamp vessel 12, an electrical element 11 in the lamp vessel 12 and current supply conductors 13,13a extending to the electric element 11. The lamp further comprises a lamp cap 15 connected to the lamp vessel 12, which has a shell portion 16 and a base portion 20 which each support an electric contact member 18. Each electric contact member 18 has a surface on which the respective current supply conductor 13 is fastened by means of a solidified connection body 19. Vause teaches an aluminum alloy containing 12% by weight of silicon as being a suitable alloy for the solidified connection body 19 (col. 5, lines 15-20). Vause suggests that the supply conductor is fused to the solidified connection body (col. 5, lines 27-33). It is noted that melting need not occur for fusion to take place as evidenced by Jochmann et al. (US 6,276,592). Jochmann teaches a well known method of fusing two objects together through

Application/Control Number: 09/817,085

Art Unit: 2879

diffusion (col. 3, lines 65-67). Vause teaches that the alloy is heat-treated after it has filled the hollow element and formed the joint (col. 5, lines 27-33) which is in accordance with a method of diffusion.

Regarding claim 3, the alloy taught by Vause, is an eutectic mixture of aluminum having approximately 12.5% by weight of silicon (col. 5, lines 15-20).

Regarding claim 5, Vause does not specifically state a solidified connection body consisting essentially of aluminum and silicon. However, it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. Thus, it would have been obvious to one having ordinary skills in the art at the time the invention was made to have a solidified connection body consisting essentially of aluminum and silicon, since the selection of known materials for a known purpose is within the skill of the art.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to *Anthony Perry* whose telephone number is (703) 305-1799. The examiner can normally be reached between the hours of 9:00AM to 5:30PM Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nimesh Patel, can be reached on (703) 305-4794. The fax phone number for this Group is (703) 308-7382.

Communications via Internet e-mail regarding this application, other than those under 35 U.S.C. 132 or which otherwise require a signature, may be used by the applicant and should be addressed to [Anthony.perry@uspto.gov].

All Internet e-mail communications will be made of record in the application file. PTO employees do not engage in Internet communications where there exists a possibility that sensitive information could be identified or exchanged unless the record includes a properly signed express waiver of the confidentiality requirements of 35 U.S.C. 122. This is more clearly set forth in the Interim Internet Usage Policy published in the Official Gazette of the Patent and Trademark on February 25, 1997 at 1195 OG 89.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956.
